

(11) Unexamined Japanese Utility Model Publication No. S58-166070

(21) Japanese Utility Model Application No. S57-63586

(22) Date of Filing: April 30, 1982

(43) Date of Publication of Application: November 5, 1983

(72) Deviser(s): Shinichi Akazaki

(54) Title of the Device: Printed wiring board

(57) Claims

A printed wiring board having an aperture-like adhesive application point, piercing a resist layer and reaching a substrate, which is formed in resist applied between conductors in order to secure a passive element component on the substrate by soldering, in accordance with the position of the component.

#### Brief Description of the Drawings

Fig. 1 is a front sectional view of a conventional printed wiring board with a component mounted thereon. Fig. 2 is a front sectional view showing a dropped state of adhesive in a conventional example. Fig. 3 is a front sectional view of a printed wiring board with a component mounted thereon in an embodiment of the present utility model. Fig. 4 is a front sectional view showing a dropped state of adhesive in the present utility model.

The reference numerals mentioned in the drawings are as follows.

- 1 Substrate
- 2 Conductor
